|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| AUTHOR INDEX, Volume 152, Number 1, April 15, 1988                                                                                                                                                                                                  | iii |
| The Internal Crosslinking of the S1 Heavy Chain from Smooth Muscle Probed by Dibromobimane<br><i>Armelle Bonet, Etienne Audemard, and Dominique Mornet</i>                                                                                          | 1   |
| A Supersensitive Dot-Hybridization Method: Rapid and Quantitative Detection of Host-Derived DNA in Recombinant Products at the 1-pg Level<br><i>Shun'ichi Kuroda, Yasuaki Itoh, Takeshi Miyazaki, and Yukio Fujisawa</i>                            | 9   |
| Inhibition of Aromatic L-Amino Acid Decarboxylase in Clonal Pheochromocytoma PC12h Cells by N-Methyl-4-phenylpyridinium Ion (MPP <sup>+</sup> )<br><i>Makoto Naoi, Tsutomu Takahashi, Hiroshi Ichinose, and Toshiharu Nagatsu</i>                   | 15  |
| Preference of Human Mitochondrial RNA Polymerase for Superhelical Templates with Mitochondrial Promoters<br><i>Jenny M. Buzan and Robert L. Low</i>                                                                                                 | 22  |
| Nucleic Acid Levels in <i>Anaplasma marginale</i> during Experimentally Induced Bovine Anaplasmosis<br><i>M. A. Martinez, N. Marquez Q., and M. Yern-Caldentey</i>                                                                                  | 30  |
| Lack of Atrial Natriuretic Peptide Receptors in Human Aldosteronoma<br><i>H. Shionoiri, N. Hirawa, I. Takasaki, Y. Ishikawa, H. Oda, E. Gotoh, M. Hosaka, M. Shimonaka, M. Ishido, and S. Hirose</i>                                                | 37  |
| Increase of Estrogen Receptor Level by Thyroxine in Estrogen-Dependent Pituitary Tumor (MTT/F84) in Rats<br><i>Nariaki Fujimoto, Bidyut Roy, Hiromitsu Watanabe, and Akihiro Ito</i>                                                                | 44  |
| Identification of 5,6,7,8-Tetrahydropterin and 5,6,7,8-Tetrahydrobiopterin in <i>Drosophila melanogaster</i><br><i>Juan J. Guillamón and Juan Ferré</i>                                                                                             | 49  |
| Efficient and Easy Synthesis of Octathymidylate Covalently Linked to Intercalating 9-Aminoellipticine<br><i>J.-J. Vasseur, C. Gauthier, B. Rayner, J. Paoletti, and J.-L. Imbach</i>                                                                | 56  |
| The 27,000-Da Stress Proteins Are Phosphorylated by Protein Kinase C during the Tumor Promoter-Mediated Growth Inhibition of Human Mammary Carcinoma Cells<br><i>Romano Regazzi, Urs Eppenberger, and Dorian Fabbro</i>                             | 62  |
| The Structure of Proteins in Aqueous Solutions: An Assessment of Triose Phosphate Isomerase Structure by Fourier-Transform Infrared Spectroscopy<br><i>José Castresana, Arturo Muga, and José Luis R. Arrondo</i>                                   | 69  |
| α-Factor-Directed Synthesis of <i>Bacillus stearothermophilus</i> α-Amylase in <i>Saccharomyces cerevisiae</i><br><i>Roberto V. Nonato and Kazuo Shishido</i>                                                                                       | 76  |
| Impaired Proteolytic Processing of Lysosomal N-Acetyl-β-hexosaminidase in Cultured Fibroblasts from Patients with Infantile Generalized N-Acetylneuraminic Acid Storage Disease<br><i>Larry W. Hancock, J. Peter Ricketts, and John Hildreth IV</i> | 83  |
| IGF Receptors in Myocardial Capillary Endothelium: Potential Regulation of IGF-I Transport to Cardiac Muscle<br><i>Robert S. Bar, Mary Boes, and Alexander Sandra</i>                                                                               | 93  |
| Increased Sulfate Uptake in Skin Fibroblasts Isolated from Cystic Fibrosis Patients<br><i>Ada Elgavish and Elias Meezan</i>                                                                                                                         | 99  |
| High Expression of an N-Acetylglucosaminyltransferase III in 3'-Methyl-DAB-Induced Hepatoma and Ascites Hepatoma<br><i>Atsushi Nishikawa, Shigeru Fujii, Toshihiro Sugiyama, Norio Hayashi, and Naoyuki Taniguchi</i>                               | 107 |
| Fatty Acid-Dependent Hydrogen Peroxide Production in <i>Lactobacillus</i><br><i>Martha S. Nuñez de Kairuz, María E. Olazabal, Guillermo Oliver, Aída A. Pesce de Ruiz Holgado, Eddy Massa, and Ricardo N. Farías</i>                                | 113 |
| Mapping of Calmodulin-Binding Domain of Ca <sup>2+</sup> /Calmodulin-Dependent Protein Kinase II from Rat Brain<br><i>Rochelle M. Hanley, Anthony R. Means, Bruce E. Kemp, and Shirish Shenolikar</i>                                               | 122 |
| Glomeruli from Ischemic Rat Kidneys Produce Increased Amounts of Platelet-Activating Factor<br><i>Antonio López-Farré, Miguel Torralbo, and José M. López-Nova</i>                                                                                  | 129 |

|                                                                                                                                                                                                |                                                                                                                                              |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Neutrophil Activation by Surface-Bound IgG: Pertussis Toxin Insensitive Activation                                                                                                             | Warren D. Blackburn, Jr., and Louis W. Heck                                                                                                  | 136 |
| The Upstream Promoter of the Human LDL Receptor Gene Does Not Contain a Cyclic AMP Response Element                                                                                            | Koichiro Takagi, Eric K. Hoffman, and Jerome F. Strauss III                                                                                  | 143 |
| Activation of Protein Kinase C from B Lymphocytes by Lipid A                                                                                                                                   | Lisardo Boscá and Muria J. M. Díaz-Guerra                                                                                                    | 149 |
| Normalization of Liver Glucosylceramide Levels in the "Gaucher" Mouse by Phosphatidylserine Injection                                                                                          | Subhash C. Datta and Norman S. Radin                                                                                                         | 155 |
| Involvement of $\text{Ca}^{2+}$ Influx in $\text{F}^{-}$ -Stimulated Pepsinogen Release from Guinea Pig Gastric Chief Cells                                                                    | Takashi Matozaki, Choitsu Sakamoto, Munehiko Nagao, Hogara Nishizaki, Yoshitaka Konda, and Shigeaki Baba                                     | 161 |
| Heat Shock-Related Decline in Activity and Amounts of Active Elongation Factor-1 $\alpha$ in Aging and Immortal Human Cells                                                                    | Suresh I. S. Rattan, Jens Cavallius, and Brian F. C. Clark                                                                                   | 169 |
| Limited Proteolysis of Bovine Adrenodoxin Reductase: Evidence for a Domain Structure                                                                                                           | Robert J. Warburton and David W. Seybert                                                                                                     | 177 |
| Human Ia-Associated Invariant Chain Gene Has Multiple Transcription Initiation Sites in CLL Cells                                                                                              | Jiro Kudo, Kazufumi Dohmen, Yoshihiro Tsuchiya, Ryuji Shimamura, Masafumi Shirahama, Hiromi Ishibashi, Yoshiyuki Niho, and Grady F. Saunders | 184 |
| Effect of Clomiphene on Fatty Acids, Sterols, and Membrane Fluidity in Clavine-Producing <i>Claviceps purpurea</i> Strains                                                                     | Sylvie Pažoutová, Vladimír Křen, Tomáš Řezanka, and Přemysl Sajdl                                                                            | 190 |
| Bile Acids of Patients with Renal Failure: Possibility of Bile Acid Secretion in the Distal Tubule                                                                                             | Nobuo Yamaga, Koichi Adachi, Hiromi Kohara, and Kyutaro Shimizu                                                                              | 197 |
| Biologically Active Calcitonin Analogs Which Have Minimal Interactions with Phospholipids                                                                                                      | Richard M. Epand, Raquel F. Epand, and Ronald C. Orłowski                                                                                    | 203 |
| Monoclonal Antibodies to the 27–34K Insulin-like Growth Factor Binding Protein                                                                                                                 | E.-M. Rutanen, T. Kärkkäinen, C. Lundqvist, F. Pekonen, O. Ritvos, P. Tanner, M. Welin, and T. Weber                                         | 208 |
| Transforming Growth Factor $\alpha$ (TGF $\alpha$ ) Induction of c-fos and c-myc Expression in C3H 10T1/2 Cells                                                                                | Anthony F. Cutry, Alan J. Kinniburgh, Daniel R. Twardzik, and Charles E. Wenner                                                              | 216 |
| Differential Uptake of Isomeric 2-Bromohydroquinone–Glutathione Conjugates into Kidney Slices                                                                                                  | Serrine S. Lau, Mary G. McMenamin, and Terrence J. Monks                                                                                     | 223 |
| Inhibitory Effect of Neurotensin on Pentagastrin-Stimulated Gastric Acid Secretion in Pylorus-Ligated Rats                                                                                     | Robert A. Hammer, Betty Wagner, and Hilda S. Soyode                                                                                          | 231 |
| Induction of Indoleamine Dioxygenase by Interferon in Mice: A Study with Different Recombinant Interferons and Various Cytokines                                                               | Marina Bianchi, Riccardo Bertini, and Pietro Ghezzi                                                                                          | 237 |
| GTP Analogues Cause Release of the $\alpha$ Subunit of the GTP Binding Protein, $\text{G}_\text{O}$ , from the Plasma Membrane of NG108-15 Cells                                               | Hayley McArdle, Ian Mullaney, Anthony Magee, Cecilia Unson, and Graeme Milligan                                                              | 243 |
| Rapid and Transient Induction of c-fos, c-myc, and c-Ha-ras in Rat Liver following Glycine Administration                                                                                      | S. Vasudevan, G. Lee, P. M. Rao, S. Rajalakshmi, and D. S. R. Sarma                                                                          | 252 |
| Evidence That the Intervening Sequence Was Excised as a Linear Molecule during $\text{D}_\beta\text{-J}_\beta$ Rearrangement in T-Cell Receptor $\beta$ Chain Gene Loci                        | Teruo Ino, Masami Hirano, and Yoshikazu Kurosawa                                                                                             | 257 |
| Bovine Liver cDNA Clones Encoding a Precursor of the $\alpha$ -Subunit of the Mitochondrial ATP Synthase Complex                                                                               | Gail A. M. Breen                                                                                                                             | 264 |
| Thyroid Hormones Inhibit the $\text{Ca}^{2+}$ Calmodulin-Induced Activation of Myosin Light Chain Kinase                                                                                       | Masatoshi Hagiwara, Shigeo Mamiya, Masahiro Ochiai, and Hiroyoshi Hidaka                                                                     | 270 |

## Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to emphasize clearly the novel aspects of the information reported.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been submitted to another Editor of this journal and also that it has not been published, that it is not under consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover. To assist us in ensuring rapid processing of your article, please submit a signed photocopy of the copyright assignment form which appears as page 3 of this "Information" along with your manuscript. (This form will not be binding if your manuscript is not accepted for publication in BBRC.) *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

**To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.**

## Preparation of Manuscripts

*Article length* should not exceed 5 typewritten pages, using one-and-a-half (1½) spacing (W spacing) on 8.5 x 11-in. high-quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

*Summary.* Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100–150 words). This paragraph should adequately summarize the pertinent findings of the paper.

*Typing.* Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division, and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be 1½-spaced on one side of the sheet: **methods, references, footnotes, tables, and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

*Symbols and Abbreviations* defined in the IUPAC-IUB Document No. 1 (*Arch. Biochem. Biophys.* (1966) **115**, 1–12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a single footnote and typed on a separate page**, rather than in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

**Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals.** The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [<sup>32</sup>P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1987) **252**, vii-xxv. Reprints are available from the Publisher.

*Footnotes, references, tables, and figure legends* should be typed single-spaced on separate pages.

*Illustrations and Tables.* **Do not attempt to insert figures, figure legends, or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering: typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 x 8 in.); the original drawings should be no larger than 8.5 x 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density. Illustrations in color can be accepted only if the authors defray the cost.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

*Page Numbers and Headings.* Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

*References* to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index*, 1985. Note the following examples.

1. Graan, T., and Ort, D. R. (1986) *Arch. Biochem. Biophys.* 248, 445-451.
2. Metzler, D. E. (1977) *Biochemistry: The Chemical Reaction of Living Cells*, p. 298. Academic Press, New York.
3. Rosenfeld, R. G., and Hintz, R. L. (1986) In *The Receptors* (P. M. Conn, Ed.), Vol. III, pp. 281-329. Academic Press, Orlando, FL.

**Note that inclusive pagination must be given.**

*Acknowledgment of Receipt.* Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

*Reprints.* Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.

Manuscript Title \_\_\_\_\_

Authors \_\_\_\_\_

I hereby confirm the assignment of all copyrights in and to the manuscript named above in all forms and media to Academic Press effective if and when it is accepted for publication by Academic Press. (For U.S. government employee authors, this provision applies only to the extent to which copyright is transferable.) I also confirm that the manuscript contains no material the publication of which would violate any copyright or other personal or proprietary right of any person or entity, and I acknowledge that Academic Press is relying on this letter in publishing this manuscript.

\_\_\_\_\_   
Date

\_\_\_\_\_   
Signed

\_\_\_\_\_   
Name (and title if not author)

To be signed by at least one of the authors (who has obtained the assent of the others, if any). In the case of a “work made for hire” (a work prepared by an employee within the scope of his or her employment or commissioned as a work for hire under a written agreement), an authorized representative of the employer should sign.

Please note: Manuscripts cannot be processed for publication until the Publisher has received this signed form.

If the manuscript is not published by Academic Press, this letter will not take effect.
